

Anglian Water Simple Acoustic Space Division

Featured Product(s):
Whisper

Partner(s):
Office Principles

When fit-out experts Office Principles were appointed to deliver the in-situ refurbishment of Anglian Water's Huntingdon office, they approached Creatif to assist by providing an acoustic solution capable of dividing space in an open plan environment - and our suspended Whisper polyester panels were the ideal choice.

These eco-friendly panels - made from 100% recycled polyester - help to reduce noise transfer by absorbing unwanted sound, all while sporting a subtle water droplet pattern to stay on-brand.
