

Creatif FI Real Estate

The asset and property management specialists at FI Real Estate are always helping people take better care of their living and working spaces, so it's no surprise that when the time came to update their own offices that they wanted the very best.

This clean, stylish environment features vast open plan collaboration and teleconferencing spaces – which despite being great for co-working, typically offer poor acoustics. This results in noise distraction and ultimately an unproductive place to work.

When approached to address this issue, Creatif's acoustic ceiling raft system - ReSound – was the obvious choice. The linear shapes create a striking feature, whilst reducing reverberation. And as Creatif's rafts are fabric wrapped and not painted, FI can enjoy acoustic comfort for years to come.
