Finish
SAA top and bottom
panel profiles
and ironmongery.

Design detail
Full-height pass-door
at one end pivot-bolted
into the track and floor
which results in no
hinges on the wall.

Twin-point suspension
- side-stacking panels
for space efficiency.

Manifestation
applied to glass by
the main contractor.

Espresso, giant machines & glass walls...

Selling high-value machinery worldwide demands a special kind of sales approach.

To deliver a truly excellent customer experience, this international company chose Clarity single glazed moving walls from Creatif as an integral part of a customer suite comprising café, lounge area, conference room and uninterrupted views of the pristine factory.

The Clarity range delivered transparency, ease of operation and the desired ambience of sheer quality.

The track was recessed up into the MF/ suspended ceiling grid and was visible only as a discreet shadow gap. A twin point suspension system was selected which had the benefit of reducing panel swing when being opened and closed. Because the panels are so slim – only 35mm – stack bay dimensions were kept to an absolute minimum.

At one end a full height pass door was incorporated complete with elegant back-to-back stainless steel D-handles. All other panels can be easily fixed in position using our patented, foot-operated shoot bolt.

Installation was carried out in two phases - first the track, and then at the end of the programme only a few weeks later we installed the remaining elements.
