

Blue Prism, Warrington Acoustic Design in Abundance

Featured Product(s):
ReSound

Partner(s):
Office Insight

Blue Prism's software platform enables business operations to be agile and cost effective through rapid automation of manual administrative processes and improving accuracy by creating a "digital workforce".

Despite their day-to-day focus on robotics, Blue Prism appreciated the need for a better workspace for their staff, appointing Office Insight to renovate their Warrington HQ.

Thanks to Creatif's Class A wall and ceiling panels - ReSound - and Office Insight's clever colour-coded zoning, Blue Prism's new space sounds as good as it looks.

With reverberation in key areas reduced, staff can concentrate on their work with ease.
