

Distrelec, Manchester A Landmark Installation

Featured Product(s):
Solo

Partner(s):
ADT Workplace

Distrelec has been at the forefront of technology and the distribution of electronics for over 65 years. Recently, the Swiss company decided to move certain European operations to Manchester, creating over 100 new jobs in the process.

A high-quality workplace was required for this process, something that fit out specialists ADT Workplace understood completely.

As space flexibility was key to the project's brief, Creatif was approached to assist in delivering operable walls.

Our Solo acoustic moving wall system not only provides effective control of noise transfer between space, it also allows rooms to be joined or separated, with operation taking just

a mere matter of seconds.

To match the Swiss-themed decor - which includes a genuine cable car acting as a meeting pod - two different stunning mountain scenes were printed onto both sides of the first Solo system.

The second moving wall we provided displayed Distrelec's corporate branding in a distinct, clean and clear manner.

The end result was a flexible environment truly capable of meeting the needs of Distrelec's employees.
