

Swiss Re, London When Two Become One

Featured Product(s):
Solo

Partner(s):
Collins Construction

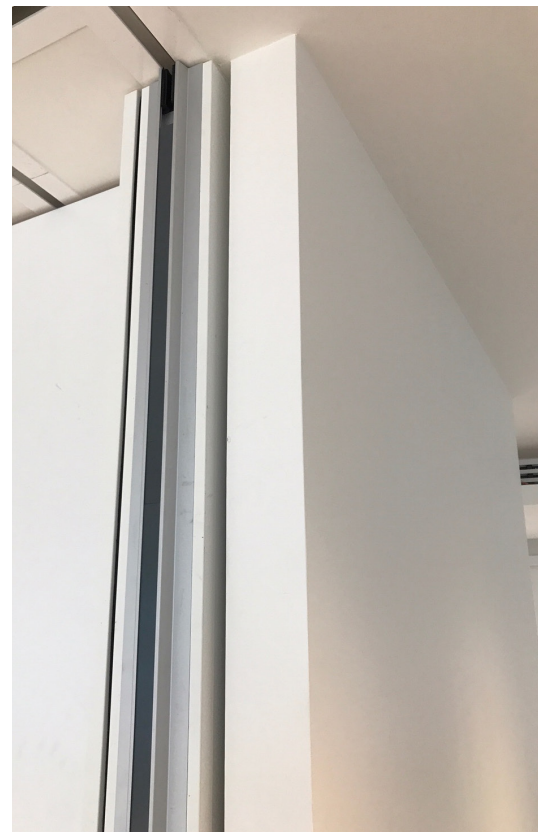

When Collins Construction required a moving wall manufacturer to help deliver an ambitious and quick refurbishment project at 30 St Mary Axe, they contacted Creatif.

Working around the primary tenant, Swiss Re, Collins modified an entire floor to include open plan office areas, meeting suites and a collaboration hub.

To help Swiss Re's staff open and close two meetings rooms, we manufactured and installed two sets of our acoustic operable moving walls, Solo.

Both sets came with a 53 dB rating for optimum acoustic comfort and were semi-automatic, enabling staff to configure the space within a matter of seconds.
